

# ALBERTA IMPLANT CENTRE

200 Huntington Galleria  
4628 Calgary Trail  
Edmonton, Alberta, T6H 6A1

February 18, 2003

To whom it may concern:

RE: Tim Stensrud, Healthcare Designer  
#37 Graham Heights  
Sherwood Park, Alberta

Alberta Implant Centre and Kucey Dental group has a state-of-the-art, 4700 sq. ft., combined dental specialty and general practice designed in 2002 by Tim Stensrud, Healthcare Designer. Tim was involved in tendering the work to several contractors, the selection of the general contractor, and was an integral part of the daily decision making during the construction phase.

The construction took place in a new building, which required collaboration with the general architect, Rick Arndt, for Huntington Galleria. Although there were unavoidable delays, Tim did everything possible to find answers and quality choices, rather than excuses and compromised results. He worked closely with us to select timeless quality materials and colors that provide a soothing upscale environment to our clients.

The design permits common areas for both practices in the reception and front desk. Our private offices and treatment coordinator's room provide quiet, yet accessible, areas for us to have meetings with our clients and referring doctors. The clinical areas have open design for the general practice, and a more private layout for the specialty treatment rooms. Consideration was given for all of the specialized equipment needs including digital radiography, surgical microscopes, network computers / entertainment centres with satellite and Internet access, and implant surgical and restorative instruments and equipment. Tim also had to include a full-service prosthodontic laboratory in the plan.

We have appreciated Tim's enthusiasm and artistic skill making our office attractive, functional, unique, and comfortable to work in. We have given several colleagues a strong reference for Tim and are confident that they will appreciate his assistance with their design needs and remain available to answer questions regarding his work ethic and abilities.

Sincerely,

  
Dr. Brian Kucey and Dr. Elena Hernandez-Kucey
