To Whom It May Concern,

Re: Tim Stensrud

During the past ten years, I have had the pleasure of working with Tim twice in the design, planning, building and decorating of dental offices in the Calgary area.

Each experience turned into a successful venture as Tim was able to bridge the gap between the concepts that I wanted to see in my "ideal" office and what was realistically achievable from both a design and cost factor. Most importantly, Tim was able to help choose and oversee a suitable contractor so that my personal involvement was kept to a "comfortable" level as I continued daily practice elsewhere.

Each time Tim exuded true professionalism and competency in our dealings together. His experience is unequalled in his field. To this day we continue to be good friends. I would highly recommend Tim to anyone considering designing and planning changes to their existing dental facilities.

Please feel free to contact me directly if you require any further information.

Sincerely,

Dr. S.R. Allen
